You: What is the healthcare policy of Bangladesh?

Agent thinking...

> Entering new AgentExecutor chain...

Invoking: `web\_search\_tool` with `{‘query’: ‘healthcare policy Bangladesh’}`

Result 1: *The Urgent Need for Developing a Common Health Insurance ...*

An official website of the United States government. # The Urgent Need for Developing a Common Health Insurance Policy in Bangladesh: A Perspective. Despite the government’s recent advancements in improving healthcare services, there is still a significant amount of work that need to be accomplished. Healthcare seekers in Bangladesh encounter numerous obstacles as a result of the exorbitant cost of medical services, including expenses for prescription medications, treatment charges, and diagnostic examinations. The World Health Organization (WHO) underscores the significance of health financing in attaining universal coverage, emphasizing the necessity of generating revenue, accumulating funds, and allocating resources to guarantee access and quality in healthcare services. A broad category of insurance policies known as “health insurance” offer benefits in case of illness or accident that results in a temporary or permanent loss of income, as well as hospitalization, medical and surgical expenses, child care, rehabilitation, and other related costs [2].
